

PATIENT SAVER COMPLETE

Introducing the Most Comprehensive Cost Containment Solution

With the constantly rising costs of brand and specialty medications, both plan sponsors and their members face growing affordability challenges with prescription drugs. **EmpiRx Health's Patient Saver Complete** program addresses these concerns by delivering a cost-containment solution that balances clinical appropriateness, holistic savings strategies, and superior member support.

Our Patient Saver Complete program represents the industry's most comprehensive cost containment solution, designed to reduce PMPM (Per Member/Per Month) costs while minimizing patient disruption. We leverage a diverse suite of savings strategies – including foundation funding, patient assistance programs, and copay assistance programs – to deliver a holistic approach to cost control that prioritizes member health and well-being.

Through our customer-first flexible fee structures, EmpiRx Health's priority is providing clients with significant savings and exceptional member service.

HOW IT WORKS

Unlike similar programs, our Patient Saver Complete solution starts with a clinical-first approach that ensures the medication prescribed is therapeutically appropriate for the member. This crucial step happens prior to the process of identifying funding support.

PROCESSING CLAIMS

A prescription is processed at a preferred pharmacy, specialty pharmacy, or Limited Distribution Drug pharmacy partner, which may trigger a clinically-driven prior authorization.

CLINICALLY-DRIVEN PRIOR AUTHORIZATION

During this robust process, we consult with the member's physician to make sure they are receiving the most clinically appropriate and cost-effective treatment for their health condition.

PATIENT ASSISTANCE PROGRAMS

After prior authorization, our Patient Saver Complete program identifies the best cost-savings opportunities across four key categories:

- Patient Assistance Program
- Foundation Funding
- Specialty Copay Assistance Program
- Non-Specialty Copay Assistance Program

As part of this process, we check if the prescription is eligible for any Patient Assistance Programs. If it is not eligible, we explore alternate sources of funding to support the member, such as copay assistance.

The bottom-line is that EmpiRx Health can provide a variety of savings options – such as standard discounts, rebates, and copay assistance – that may net even more significant savings.

HIGH-TOUCH MEMBER EXPERIENCE

A dedicated team of cost-containment specialists guides members through the enrollment process. They work with members to coordinate with their pharmacies and facilitate future cost-savings opportunities. Our teams provide ongoing support to ensure a consistent, seamless member experience.

Why EmpiRx Health's Patient Saver Complete Program is Right For You:

Ensures clinically appropriate treatment at the lowest-net cost.

Leverages the widest range of assistance programs to find the best cost-saving opportunities.

Takes discounts, rebates, and various savings opportunities into account to ensure we find the most substantial savings while minimizing member disruption.

Employs dedicated specialists to deliver high-touch service, simplifying the process and providing ongoing support for your members.

Closely aligns with your financial goals by offering different options for capturing your savings.
